About AED access

Our consultants have extensive experience and expertise in the field of accessibility for all types of building classifications and uses. We ensure your building work always considers and complies with current legislation and requirements.

AED Access offers a personalised service, ensuring our clients™ needs are always regarded as a priority. This attitude motivates us to apply our complete expertise to every project regardless of scope and size.

Our consultants are affiliate members with The Association Of Consultants in Access Australia (ACAA), are registered assessors under Liveable Housing Australia and hold BPB (un-restricted) A1 Accreditation which enables our consulting on any building project, irrespective of size or complexity.

AED Access is dedicated to providing innovative, cost effective solutions while ensuring client satisfaction and independent, equitable and dignified access for all.

Our mission is to create accessible and flexible facilities allowing for comfortable movement in our built environments. It is through our understanding and expertise that access friendly environments are considered and constructed in a functional and economical manner.

AED Access Services

- Development of comprehensive access audits, concept design reviews and due diligence reporting.
- Provision of advice, from initial planning through to design development and ultimately gaining final construction compliance.
- BCA Audits and due diligence reports on existing buildings.
- Development of Alternative Solutions to satisfy the performance requirements of the BCA
- Provisions of advice and interpretation of BCA, Australian Standards (AS1428, AS1735.12, AS4299), the Disability Discrimination Act 1992 (DDA) ,the Disability (Access to Premises Œ Buildings) Standards 2010, SEPP (Senior Living) 2004 and Liveable Housing Guidelines (Registered Assessor 10007)
